

Renta Solutions – Automotive Expert

We are looking for an Automotive Expert

Are you passionate about the automotive industry and equipped with sharp analytical skills? As an **Automotive Matrix Specialist**, you play a crucial role in managing and analyzing data related to car parts, pricing, and costs. You combine your knowledge of vehicles and data to create innovative solutions and contribute to a more efficient future within the automotive sector.

Your Role

1. Expanding Knowledge of Car Parts and Market Trends

- Utilize and deepen your understanding of car parts, repair processes, and vehicle life cycles.
- Keep track of market prices and costs for parts and maintenance services, identifying trends and opportunities.

- Support the team in identifying key maintenance actions and replacements for different vehicle stages.

2. Data Analysis and Reporting

- You analyze datasets related to car parts, cost structures, and market developments.
- You draw clear conclusions from data and translate them into recommendations for improvements in IT and business processes.
- You prepare insightful reports that support decision-making and strategy.

3. Developing Business Cases

- You create compelling business cases for new projects or system improvements, focusing on process optimization, cost control, and customer satisfaction
- You evaluate the impact and feasibility of initiatives and translate business needs into practical IT solutions.

4. Catalog Management

- You develop and maintain a standardized catalog of car parts, tasks, and associated costs.
- You ensure the catalog is always up-to-date and complete, and you draft specifications and methods for new entries.

5. Price Validation

- You support cases involving the accuracy of car part pricing.
- You perform price validations and ensure prices align with market trends and cost structures.

6. Support for Garages and Integration

- You assist garages with the integration of their systems into the organization via web services.
- You provide technical and functional support, including documentation and training, to ensure seamless collaboration.

What qualities do you need?

Education and Experience

- A degree, preferably in automotive, business administration, engineering, IT or equivalent work experience.
- Knowledge of the automotive industry, car parts, maintenance processes, and vehicle life cycles.
- Experience with data analysis and data-driven recommendations.
- Familiarity with (IT) systems, web services, and data integration.
- Knowledge of DMS is a must.
- Experience in creating business cases is a plus.

Skills

- Analytical skills: you translate complex data into practical insights.

- Excellent communication skills: you can convey technical information clearly.
- Independent and team-oriented: you prioritize effectively and achieve goals together.
- Attention to detail: you work with precision and a focus on quality.
- Languages: English is necessary with Dutch and/or French.

Competencies

- Proactive and results-oriented.
- Customer-focused, with a drive to deliver valuable solutions.
- Flexible and able to adapt quickly in a dynamic environment.

What can we offer you?

- A challenging role in an innovative and growing organization.
- The opportunity to apply your expertise in a forward-thinking sector.
- An informal work environment where your ideas and insights make a real impact.
- Opportunities for personal development and growth.
- Flexible working hours to help you maintain a healthy work-life balance.
- The option to work from home 2-3 days/week.
- Attractive compensation and benefits package such as a car, meal vouchers, insurance,....
